

Stat222: Weekly Update

Hui-Fang Ko, Hsin-Wei Tsao

Feb 16, 2014

This week, we collected data that we are going to use in our model, including housing price in different area. Also, we cleaned the data we already have (only keep the variables that we need), made sure they are in good order to use, and combine them with new data we found. Moreover, we thought more deeply about the methods that we are going to use in building models. (We plan to talk to Victoria in Tuesday's OH.)
